It's time to get back to basics.

The Rescue 900 is the essential, basic portable power pack. It starts cars, light trucks, any powersports equipment, boats, etc. At its heart is a powerful 18AH sealed AGM battery, and it comes with 100% copper welding cables fitted with professional mechanic's clamps.

It has an onboard battery charger, LED lights to monitor the charge of the internal battery, and a handy 12V power outlet. It's light-weight and compact.

But don't underestimate it. If all you need is a basic power pack to jump start your stuff, you can't do any better than the Rescue 900. The Rescue 910 is essentially the same, but has a battery installed and warranted by your local retailer.
